Evening Brief

Date: July 30th, 2021

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Moderate Initial Attack Activity
National	PL 5	New Fires and Acres: 30 fires for 132.13 acres / -77 acres Large Fire Growth (decrease LFG due to more accurate mapping)

Weather Summary:

... Increasing Wet Thunderstorms Spreading north Sat/Sun ...

... Risk of Flash Flooding/Debris Flows with Heavier Rains over the Weekend...

... Drier and Warmer weather Returns Next Week ...

Wetter showers and thunderstorms are expected area wide Saturday and Sunday as monsoonal moisture continues to stream northward into the Great Basin. Heavy precipitation amounts are possible over central and eastern portions of the Great Basin for the weekend and over parts of Idaho and Wyoming. Showers and thunderstorms will linger over parts of Central and Eastern Idaho, Wyoming, and Northern Utah on Monday before drier weather spreads across the Great Basin.

Localized flooding and debris flows are possible in areas where heavy rain falls over recent burn scars.

Drier air pushes into the western half of the Great Basin on Monday, then to most areas of the Great Basin by Tuesday. Temperatures will warm with significantly lower humidity. A weak disturbance may bring a few thunderstorms to Idaho by mid-week, but otherwise mostly dry and warm weather is expected through the end of the week.

Fuels/Fire Potential:

.... Fuels and Fire Behavior Advisory in effect for Idaho, and Northern Portions of Both Utah and Nevada and Along the Sierra Front ...

Large fire potential remains elevated over Western Idaho, into Northwest Nevada where conditions have been quite dry recently and moisture with thunderstorms was spotty and limited over the last few days. Additional moisture is expected in all areas through the weekend, which is expected to at least temporarily lower fire danger in some areas for several days. However, drier conditions will return to western areas by Monday and to most areas by Tuesday next week.

Fuels in the southern half of the Great Basin have moistened significantly in most areas, with continued moistening in the coming days...with minimal large fire potential for the time being.

Resources:

Aviation within the Great Basin

- 0 VLAT, 1 LATs, 0 CL-415
- 25 SEATs, 0 FB, 9 AA, 0 ASM, 2 LP
- 10 Type 1 Helicopters / 9 Comm.
